ELSEVIER

European Journal of Operational Research 88 (1996) 637–638

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 88

1 Editorial
3 Stochastic vehicle routing (Invited Review)
M. Gendreau, G. Laporte and R. Séguin
13 Variations in price elasticities
J. George, A. Mercer and H. Wilson
23 On the impact of infrequent trading on the APT systematic risk components — Evidence from a thin security market
T. Martikainen, J. Perttunen, P. Yli-Olli and A. Gunasekaran
28 Choosing regulatory options when environmental costs are uncertain
H.W. Gottinger
42 AHP-based synergy allocation to the partners in a merger
W. Ossadnik
50 Optimal procedures for the discrete time/cost trade-off problem in project networks
E.L. Demeulemeester, W.S. Herroelen and S.E. Elmaghraby
69 Stock cutting to minimize cutting length
J. Bhadury and R. Chandrasekaran
88 A Stochastic Dynamic Programming model for scheduling of offshore petroleum fields with resource uncertainty
K.K. Haugen
101 Heuristics and exact algorithms for solving the Monden problem
J. Bautista, R. Companys and A. Corominas
114 A Lagrangean heuristic for the maximal covering location problem
R.D. Galvão and C. ReVelle
124 Scheduling programs with repetitive projects: A comparison of a simulated annealing, a genetic and a pair-wise swap algorithm
A. Shtub, L.J. LeBlanc and Z. Cai
139 Mechanisms for local search
E.J. Anderson
152 Analyzing service blueprints using phase distributions
B.J. Berkley
165 On genetic algorithms for the packing of polygons
S. Jakobs
182 Computational comparison on the partitioning strategies in multiple choice integer programming
E.Y.H. Lin and D.L. Bricker

203 Statistical quality control and improvement (Invited Review)
M. Stuart, E. Mullins and E. Drew
215 Strategic planning of transportation services for petroleum products: an application of capacitated gravity models
L.D. Smith and S.W. Moses
231 Scheduling crackdowns on illicit drug markets
A.V. Naik, A. Baveja, R. Batta and J.P. Caulkins
251 Economical and ecological utility oriented analysis of the process of anaerobic digestion of waste waters
Yu. Pavlov, D. Grancharov and V. Momchev
257 Determination of the portfolio selection for a property-liability insurance company
S.X. Li and Z. Huang
269 SIMPSON: An intelligent assistant for short-term manufacturing scheduling
J.H. May and L.G. Vargas
287 Setting planned lead times for multi-operation jobs
H. Matsuura, H. Tsubone and M. Kanezashi
304 On the estimation of optimal batch sizes in the analysis of simulation output
W.T. Song

320 Project management with time, cost, and quality considerations
A.J.G. Babu and N. Suresh
328 Scheduling about a given common due date to minimize mean squared deviation of completion times
X. Weng and J.A. Ventura
336 Scheduling jobs with different, job-dependent earliness and tardiness penalties using the SLK method
G.I. Adamopoulos and C.P. Pappis
345 A dominant subset of V-shaped sequences for a class of single machine sequencing problems
U.M. Al-Turki, J. Mittenthal and M. Raghavachari
348 Arbitrated matching: Formulation and protocol
W.-Y. Ng, K.-W. Choi and K.-H. Shum
358 Minimizing deviations from the group mean: A new linear programming approach for the two-group classification problem
K.F. Lam, E.U. Choo and J.W. Moy
368 A combined constraint-space, objective-space approach for determining high-dimensional maximal efficient faces of multiple objective linear programs
J.P. Dauer and R.J. Gallagher
382 Conditional subgradient optimization – Theory and applications
T. Larsson, M. Patriksson and A.-B. Strömberg
404 A strategy for evolution of algorithms to increase the computational effectiveness of NP-hard scheduling problems
D.-C. Li, H.-K. Lin and K.-Y. Torng

413 Optimization and sensitivity analysis of computer simulation models by the score function method (Invited Review)
J.P.C. Kleijnen and R.Y. Rubinstein
428 Modelling resource availability in general hospitals. Design and implementation of a decision support model
R.J. Kusters and P.M.A. Groot
446 Integration of operation routing and economic production quantity decisions in batch manufacturing systems
P.J. Egbelu
464 The team orienteering problem
I-M. Chao, B.L. Golden and E.A. Wasil
475 A fast and effective heuristic for the orienteering problem
I-M. Chao, B.L. Golden and E.A. Wasil
490 The capacitated distribution and waste disposal problem
J.M. Bloemhof-Ruwaard, M. Salomon and L.N. Van Wassenhove
504 Cash flow optimization in delivery scheduling
M. Dror and P. Trudeau
516 An SA/TS mixture algorithm for the scheduling tardiness problem
B. Adenso-Díaz
525 Robustly efficient parametric frontiers via Multiplicative DEA for domestic and international operations of the Latin American airline industry
A. Charnes, A. Gallegos and H. Li
537 Implied constraints and an alternate unified development of nonlinear programming theory
P.K. Johri
550 Finding improving directions in Lagrangian relaxation by fictitious play: A NASA scheduling application
C.E. Bell
563 A simple Tabu Search method to solve the mixed-integer linear bilevel programming problem
U.P. Wen and A.D. Huang
572 Pseudo-invexity and duality in nonlinear programming
S. Nanda and L.N. Das
578 Testing integer knapsacks for feasibility
P. Hansen and J. Ryan
583 A note on returns to scale in DEA
R.D. Banker, I. Bardhan and W.W. Cooper
586 Optimizing flow rates in a queueing network with side constraints
B. Pourbabai, J.P.C. Blanc and F.A. van der Duyn Schouten
592 A simple heuristic for buffer design in finite-capacity queues
F.N. Gouweleeuw and H.C. Tijms
599 Discrete *NT*-policy single server queue with Markovian arrival process and phase type service
A.S. Alfa and I. Frigui
614 Queueing models with delayed state-dependent service times
P.P. Wang
622 A *K*-step look-ahead analysis of Value Iteration algorithms for Markov decision processes
M. Herzberg and U. Yechiali
637 Contents Volume 88
